PREFACE.

THE following pages do not affect to be a perfect Index to the *Archaeology of Norfolk*. Such an Index would be an impossibility, and I have not attempted it; but I have taken considerable pains to compile one which will be of some use to myself, if to no one else. The references to MSS. will probably be new to most of my readers.

Practically it will serve to some extent as an Index to the Catalogue of the books in the Carrow Library, which is not too easy to consult under subjects.

This little book will, I expect, be the last of my Norfolk Indexes. With its two predecessors it makes 785 pages, and they will, I trust, be of use to the rapidly-increasing number of students of Norfolk Archaeology.

I am having copies inlaid and interleaved, and propose to post them up with all the additions and corrections I can get, and leave them to the Norfolk and Norwich Archaeological Society for future use.

Any corrections and additions will be thankfully received, and I take this opportunity of heartily thanking Mr. L. Bolingbroke and Mr. J. Hooper for the kind way they have gone through the proofs, and for the many additions they have made to my original notes.

WALTER RYE.

APPENDIX II.

Some suggestions as to searching the MS. mentioned in Appendix I. and other sources of information.

Genealogists will find it convenient to consult the MSS. in something like the following order :—

As the time I can give visitors is necessarily short, anyone wanting to make a long or comprehensive search must kindly do so *through some Record Agent known to me*, with whom I can arrange as to hours of attendance. It is impossible for me to say what this will cost, but a general search for references only (*not extracts*) through the Indexes for any not too common name would probably come to about £1. 1s. 0d. I do *not* and cannot undertake the searches myself.

I greatly regret that I cannot promise to make gratuitous searches for unknown correspondents, though on receipt of a stamped envelope I will answer any short specific reasonable query.†

† As an example of *unreasonable* queries I may say that one American sent me 5s. in stamps, and said he wanted *all* the Norwich Churches searched for about 20 years for a baptism, a commission I declined with thanks.
